Topic :- Computer Engineering Role in COVID-19 Pandemic

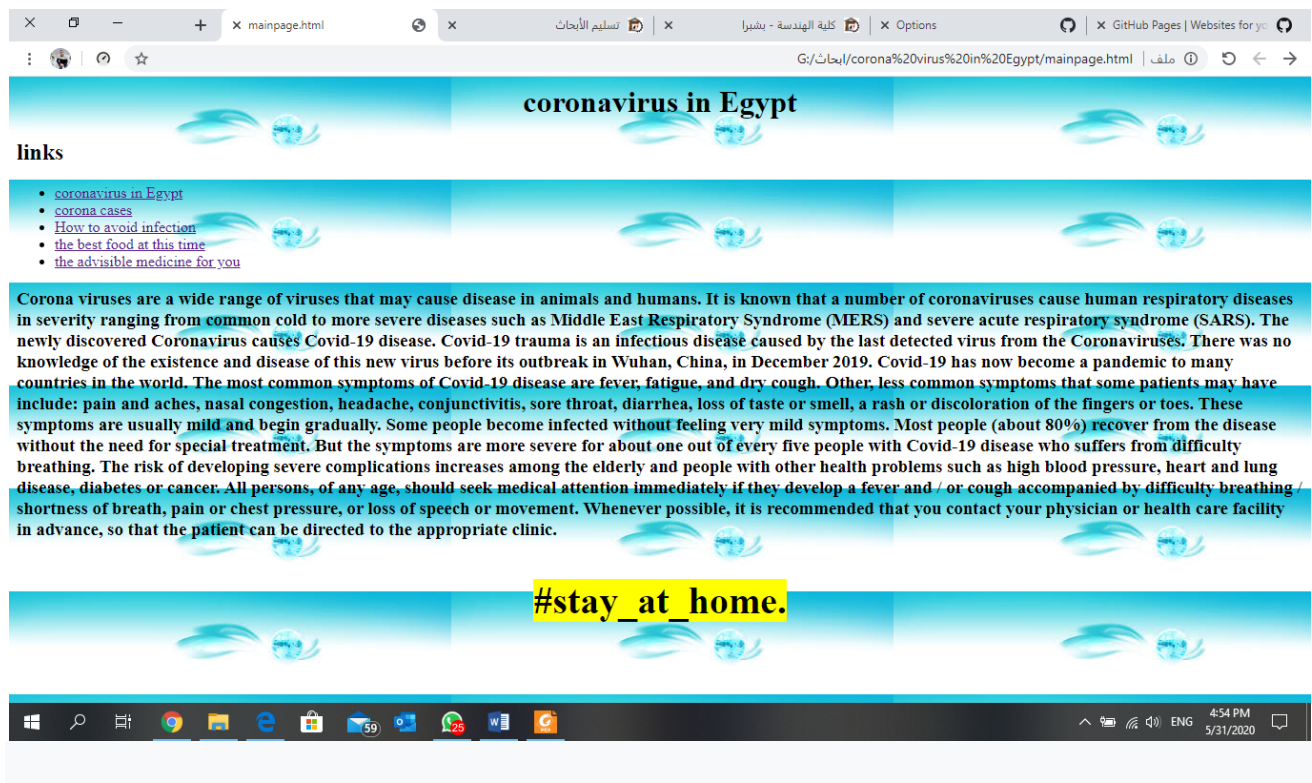

Application brief : covid-19 is a pandemic which need the help of computer Engineering to make people know the statistics and to aware people to avoid this pandemic through introducing instructions for them such as how the Illness spread and educate them how to deal with the illness and patients ,sometimes doctors can't go to the patient ,so he can communicate with him on internet and give him instruction and advise him what should do or not and what is the medicine he should take or avoid it .

Wash hands regularly as this helps to kill viruses.

Be sure to cover the mouth and nose by bending the elbow or a tissue with coughing or sneezing, then dispose of the tissue immediately by throwing it in a closed waste bin and clean your hands with an alcohol cleanser or with soap and water.

Avoid touching your eyes, nose and mouth, because if the hands are infected, the virus can spread easily in the body.

Be sure to follow the latest developments regarding Covid-19 disease. Follow the advice provided by your health care provider and that issued by local and national public health authorities or your employer on ways to protect yourself and others from infection with COFED-19..
